

We are in need of a Programmer Analyst to join our IT Department!

The Programmer Analyst's role is to maintain software systems to provide for our business needs. Duties will include reviewing, analyzing and modifying programming systems including encoding, testing, debugging, and installing to support the organization's client/server software applications. Includes interfacing with other systems, internal and external checks and controls, and outputs.

Qualifications:

- Be a US Person according to ITAR definition (US Citizen, Permanent Resident or Political Asylee)
- Bachelors degree in a related field and 1-4 years directly related work experience, or an equivalent combination of education and work experience.
- Familiar with commonly used IT concepts, practices and procedures.
- Knowledge of C++, relational database and client/server concepts, JDE Enterprise One and EDI.
- Able to rely on experience and judgment to plan and accomplish goals.
- Good communication and team interaction skills.
- Must be able to speak, read, write and understand English.

Wesco offers a competitive compensation and benefit package including medical, dental, vision and life insurance, FSA, 401(k), and paid vacation and personal time.
