

The Power to Question

Santa Cruz Biotechnology, Inc. (SCBT) is a worldwide leader in the production of research reagents. We are rapidly expanding and have an immediate opening for a Webmaster. If you have a degree in Computer Science (or will soon graduate) and solid web development experience, then this is the perfect job for you!

The Webmaster position is located at SCBT's beautiful Paso Robles facility. SCBT offers a friendly and professional business environment. Join our growing and dynamic team and apply today

Responsibilities include, but are not limited to, the following:

- Knowledge of PHP, HTML, Photoshop, Javascript, JQuery, MySQL, CSS, XML, Ajax, MAMP and Aptana/CVS.
- May be involved in extensive development of new and existing databases for the web. Familiar with FileMaker Pro database is a plus.
- Responsible for maintenance, reorganization, and expansion of multiple language websites with localization tools.
- May be involved in researching, developing, and implementing on-site, in house website and service hardware utilized in such.
- May be involved in research and implementation of current and future services such as: Internet, web browsers, E-mail, website security, and integration of current in-house systems and databases.
- May be involved in writing, updating, and implementing reports to include interaction with existing FileMaker Pro databases.
- Customarily works independently and regularly exercises discretion while researching, planning and implementing web updates and procedures. Must be highly organized, detail oriented, and exercise exceptional common sense and good judgment.
- Ensures that procedures and processes are documented for reference and future training of new employees within the specific area of influence.
- May be involved in special projects.

Position typically requires 1-3 years prior computer support experience, a degree in Computer Science or Information Management or related technical training, or equivalent experience. Teamwork and collaborative work style a must. Excellent management skills, strong critical thinking skills, good judgment and organizational abilities, and excellent business communication skills (verbal, written, presentation) required. Ability to work independently, as well as work professionally with Executive Management, company staff and outside consultants.

Please send resume and cover letter to hr@scbt.com.
