Overview:

Kart Racer is a 3D racing video game. The player will control a vehicle in which they drive around a track and attempt to set a record time against the clock. This game will incorporate ideas from games such as Mario Kart and Crash Team Racing. This game will be single player.

System Overview:

This project will be made using C++, OpenGL, OpenAL, and Xwindows. It will also incorporate models made using Blender 3D Software. It will be made specifically for the Linux Operating System.
