

## RowdyHealth, a website designed to help people make informed decisions on their health!

### About Our App

- Provides navigation to health care facilities that meet your needs
- Find healthcare locations that works with your insurance
- Store medical information onto a user profile
- Personalized articles that relate to your profile information

### Real Life Examples

- Avoid going to a hospital that does not take your insurance
- Confirm that a hospital treats cardiac patients before going.
- Need to store your health history and medications? The profile can store that and more!

### Tech Utilized

### Pictures of our Website

The website homepage, which shows the navigation bar and the available health locations.

Ed K		
History	Allergies	Medications
High Blood Pressure	Sulfa	Metformin
Diabetes	Fentanyl	Lisinopril
High Cholesterol	NSAIDS	Xanax

The user profile which shows the users stored medical problems

Tailored health articles with ability to search

### Our Goal

RowdyHealth aims to help people make informed decisions about their healthcare.

### Challenges

- Implementation of pinning locations
- Learning curve of web development
- Implementation of connecting the client side of our application with the remote CSUB server.

### Website Flow

### What's Next

- Daily health tips for users
- Medical Reminders for medications, glucose, etc.
- Ability to take pictures and add to profile.
- Match medical profile to specialty centers

### FUTURE
